The demonstrator this year is Pat Nowak. He began making knives in junior high school. This was his inspiration to pursue metallurgical engineering as a profession. While in college he picked up blacksmithing and has been forging since 1997. He has been a full-time metallurgical engineer for 22 years, first at Timken and the last 20 with Scot Forge. His forging specialty is mokume gane - laminated nonferrous metals. Professionally he specializes in developing forging and heat treat processes for carbon, low alloy and stainless steels.
